An outline map of Washington state is positioned on the left side of the cover, partially overlapping the title area. The map shows the state's coastline and major landmasses.

# ANNUAL TRAFFIC REPORT

1972

Washington State Highway Commission  
Department of Highways  
IN COOPERATION WITH THE  
U.S. Department of Transportation  
Federal Highway Administration

## INTRODUCTION

The administration of approximately 6,900 miles of roads on the State Highway System involves the expenditure of millions of dollars annually for design, construction and maintenance. This requires the need for reliable and current traffic volume data, vehicle type classification and travel statistics throughout the state. Such a record is essential to proper estimation of present and future highway use, needs and cost. It is of importance not only to the Highway Department, whose primary concern is highways, but to various Federal, State and local agencies, business organizations, research groups and individual citizens.

The location and design of new highways, with their interchanges and bridges, are contingent upon present traffic volumes and also of future volumes forecast on the basis of past and present day traffic data. Without this basic information, it would be impossible to build roads economically and yet with the capacity adequate for future needs and designed for maximum safety.

Numerous other functions of the Highway Department are also served by traffic data. For example, average daily traffic volume is one of the items taken into consideration in the setting of speed limits, channelization, signalization and vehicle miles.

Special studies are often required as a guide for legislation on highways. These cover the highways use, needs and cost for which traffic data is essential.

The 1972 Annual Traffic Report contains comparative average daily traffic volumes for the years 1959 through 1972. Percentages of commercial vehicles are shown at all locations listed in the report and separated into two types, single-units and combinations. Single units consist of two and three axle trucks and busses, combinations included all multiple axle truck combinations and cars or pick-ups pulling trailers. Included in the forward section of the report are summaries of historical traffic data at permanent traffic recorders, toll ferries and bridges. Also, included on the front inside cover of the report is a copy of the 1972 Washington State Traffic Flow Map.

There are some state route alignments where one-way couplets occur. Because these are difficult to show in printed form, we have deleted them from the listed section and they are shown in sketch form in the back of the report. The areas are as follows: Aberdeen, Centralia, Port Angeles and Puyallup.

Total traffic on all State Highways increased 3.3% from 1971 to 1972.

Inquiries relating to traffic should be directed to the Planning Survey Division, Traffic Section - 753-6086.

H. R. GOFF

Assistant Director for  
Planning, Research and  
State Aid

a/ Directional counters installed on new alignment, October 19, 1959

b/ Installed April 26, 1961

c/ Installed November 1964

d/ Installed March 1964

e/ Installed May 1966.

f/ Moved to new freeway alignment August 1967.

g/ Moved to new location February 1968

h/ Installed April 1968

i/ Decrease due to opening of SR 82

j/ Installed January 1, 1972.

k/ Installed May 21, 1971

l/ Installed October 14, 1971
